Nextek Fanworks full installation manuals can be downloaded at
<http://nextekpower.com/support/installation-manuals>

Select either the Vari-Fan or Vari-Cyclone installation manual to download a pdf version of the documentation.

IMPORTANT INFORMATION:

Warranty:

All fan bodies and fan motors are warranted against defect for one (1) year from time of sale. Please keep any dated invoices or sales receipts for proof of purchase.

Start-Up Information:

1. All Nextek Fanworks DC-powered ceiling fans should be used in conjunction with the Nextek 12/24V Speed Controller.
2. If operating in a 12V environment, the 12/24V Speed Controller is **required**.
3. All Nextek Fanworks DC-powered ceiling fans can be operated above 24VDC, but not to exceed 48VDC. A 48VDC Speed Controller can be ordered.
4. A Nextek 12.6 watt solar panel is available and is perfectly matched to this DC-powered ceiling fan and Speed Controller.
5. New Installations: Appropriate sizing of a solar panel, battery and battery charge controller are essential for proper operation. Consult a qualified installer of DC devices to ensure correct configuration.
6. Existing Environments: Great care must be taken to ensure fan is wired properly in existing DC power environments. Warranty may be violated if attempting to operate in anything other than 12/24 VDC. Please consult a qualified technician.
7. Failure to wire correctly, or installation in non-recommended power environments may violate your warranty.

CAUTION

1. Read the entire ceiling fan instruction manual carefully before beginning installation. (See above for download location.)
2. To avoid possible electric shock, be certain electricity is shut off at main panel before wiring.
3. All wiring must be in accordance with national and local electrical codes. If you are unfamiliar with wiring, you should use a qualified electrician.

Nextek Fanworks is doing our part to be Totally Green. See more at <http://nextekpower.com>
